

Calyxia appoints IMCD as Distributor of Next-Generation Microencapsulated Epoxy Accelerators across EMEA for Adhesives, Coatings and Electronic Compounds

Paris, France – October 16, 2025

Calyxia, a pioneer in advanced and sustainable microcapsules, has entered into a strategic distribution agreement with IMCD, a leading global partner for the distribution and formulation of speciality chemicals and ingredients. This partnership grants IMCD exclusive rights to distribute Calyxia's Catalyx™ H product range in the EMEA region across adhesives, coatings and bonding of electrical and electronic compounds, accelerating the adoption of smarter, more sustainable epoxy systems.

Calyxia has selected IMCD Group as its distribution partner, recognizing IMCD's market reach through its global network of laboratories and sales teams, technical expertise, and proven market leadership across multiple industries.

The Innovation Behind Catalyx™ H

Epoxies are widely used in coatings and adhesives for their excellent chemical resistance, durability, and adhesion. Traditional epoxy formulations in coatings often force a trade-off between fast curing and long shelf life, slowing throughput, increasing cold-chain dependency, and generating costly waste.

Calyxia's **Catalyx™ H microcapsules eliminate** this compromise.

- **Ambient-stable latency with rapid, on-demand cure**
- **No refrigeration or cold-chain logistics** required
- **Enhanced throughput, lower energy use, reduced scrap**
- **Full compatibility** with existing manufacturing infrastructure

Using Calyxia's patented **double-emulsion microcapsule technology**, Catalyx™ H enables formulators to unlock previously unattainable performance, cost and sustainability benefits.

Jamie Walters, CEO and co-founder of Calyxia, comments: "We are excited to join forces with IMCD to bring our new Catalyx™ H microcapsules to even more markets in EMEA. Combining IMCD's market understanding with Calyxia's cutting-edge product technology and solutions, I am convinced that we will accelerate our global impact and bring new speed, reliability, sustainability and cost benefits to the fast-growing epoxy markets."

Jerome Bollard, Global Technical Director Coatings & Construction comments:

"Showcasing and promoting the benefits of Calyxia products to our EMEA customer base is

what IMCD has to offer. We are excited to add the unique Calyxia technologies to our wide portfolio and join forces together to capture market opportunities in the epoxy market.”

About Calyxia:

Calyxia is an Industrial B2B CleanTech innovator based in the Paris region, France, that designs and manufactures the world's first advanced and sustainable microspheres and microcapsules. Calyxia, with the motto "Advanced Sustainable Chemistry", harnesses and combines pioneering technologies in chemistry and emulsion science to develop new industrial solutions for a wide range of applications. Calyxia partners with world-leading manufacturers in the Agriculture, Home & Beauty and Advanced Materials industries to help unlock an advanced and sustainable future for all. Its products create a step-change in the environmental footprint, cost-effectiveness and performance of everyday products that are essential to our quality of life.
